

ZeroFly®

Hermetic | by VESTERGAARD

Total protection

The first and only insecticide treated storage bag with a 9 layer hermetic liner protecting your grains and seeds against internal and external insect attacks

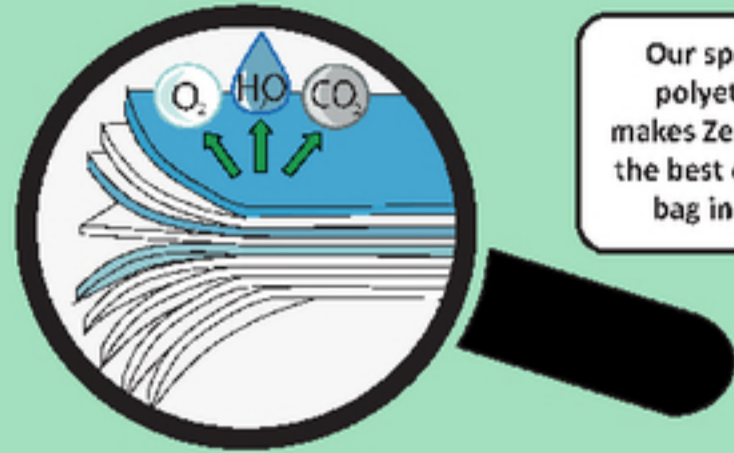

ZeroFly® Hermetic is the ground-breaking innovation for the safe storage of grain, seed and pulses. An ideal solution for small and medium size farmers, it can be stored in areas with existing insect infestation without any risk.

1. The **highest quality hermetic inner liner** ensures full protection for grain even when already infested by insects.
2. Vestergaard's **slow release insecticide-incorporated outer bag** ensures that no insects can attack the stored grain or seed for up to 36 months.

Key features

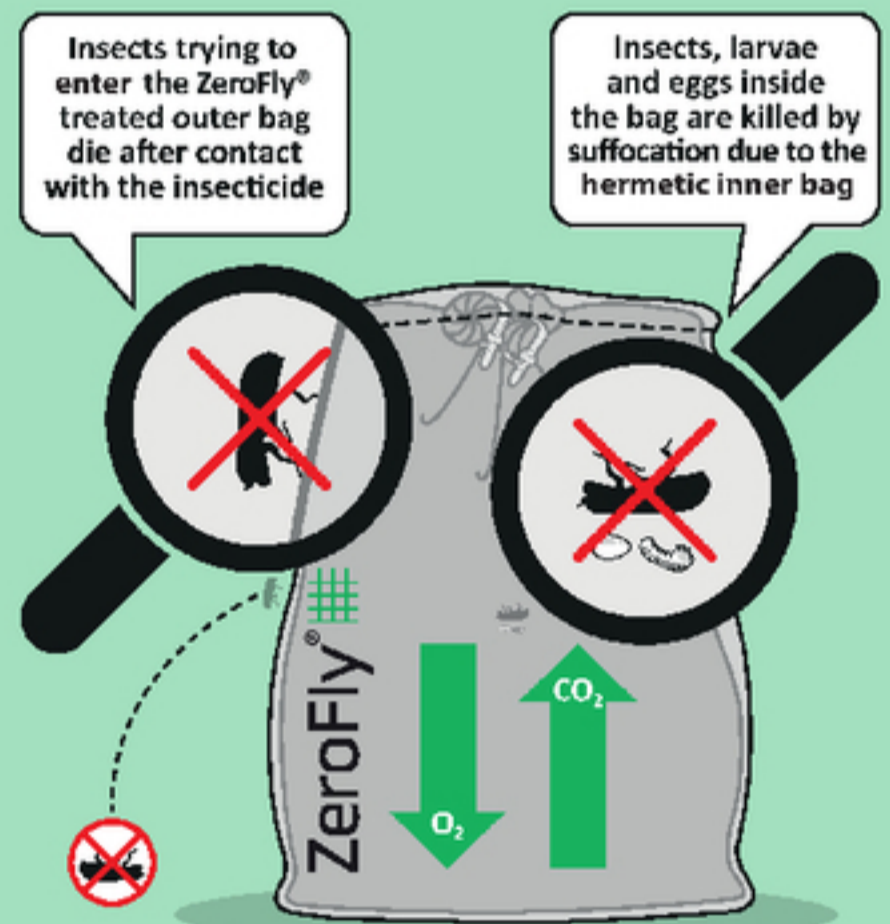

- **Affordable:** very competitive price and reusable many times over two years
- **Environmentally friendly:** no need to fumigate and use chemicals during storage
- **Safe:** reduces pesticide residues commonly found in grain and seed and decreases risk of aflatoxin and mould build up
- **Effective:** proven global efficacy against key insect pests; including Weevil and Larger Grain Borer
- **Durable:** proven to last for up to three years even under the toughest environments
- **Tailored to your needs:** available in any size from 10 to 1000 kg and in any color with customized prints
